PROFESSIONAL SUMMARY

MCA graduate with a Data Science Internship and a strong foundation in machine learning and deep learning. Proficient in Python and SQL, with hands-on experience in data visualization and cleaning. Skilled at extracting actionable insights from large datasets to drive decision-making. Passionate about applying data-driven techniques to solve real-world problems. Strong communicator with a focus on documentation and presentation.

WORK EXPERIENCE

Data Science Intern

Camerin Folks | Dec 2024 – June 2025

- Utilized Python for data manipulation and basic scripting.
- Developed and trained machine learning/deep learning models for different tasks.
- Used tools like TensorFlow, Keras, Scikit-learn, Pandas and NumPy for model development and data preprocessing
- Applied CNNs, RNNs and other architectures for tasks including computer vision, NLP and time series forecasting
- Performed data analysis and visualized insights using matplotlib and seaborn, documenting and presenting key findings effectively

PROJECTS

FESTIVERSE: Event Management Platform

This system is a platform tailored for public seeking seamless access to a diverse array of decorations and program events.

STOCK MASTER: Inventory Management Web App

The system helps Shop keepers to order goods in bulk form through this web application according to their stock availability

COURSE RECOMMENDATION SYSTEM: A machine learning system

Developed a collaborative filtering-based ML model to recommend courses based on student's subject marks

SMART OBJECT COUNTER: A machine learning system

Developed an object detection and counting system using machine learning models to accurately identify and quantify objects in images

EDUCATION

MCA, University of Calicut, Dr. John Matthai Centre

Thrissur, 2022-2024

BSc Computer Science, University of Calicut, CAS Chelakkara

Pazhayannur, 2019-2022

SKILLS

Technical

- **Programming Languages:** Python, HTML, C, C++, Java
- **Data Analysis & Processing:** Data Cleaning & preprocessing | Exploratory Data Analysis (EDA) | Feature Engineering and selection
- **Machine Learning:** Regression, Classification Models | Clustering, Dimensionality Reduction | Model Evaluation
- **Machine Learning libraries & Tools:** Scikit-learn, XGBoost, Pandas, NumPy
- **Deep Learning frameworks:** TensorFlow (basic), Keras (basic), PyTorch (basic)
- **Database:** SQL (Basic Queries, Data Retrieval)
- **Visualization Tools:** Matplotlib | Seaborn | Power BI
- **Tools & Platforms:** Google Colab | Visual Studio code

Professional

Problem-Solving, Analytical Thinking, Leadership, Documentation, Team Collaboration, Time Management, Communication
